SS1 SECOND TERM GENERAL REVISION

Subject: Information & Communication Technology (ICT)

SECTION A: OBJECTIVE (100 MARKS)

Choose the correct answer from A–D.

21st Century Digital Skills

1. Digital literacy refers to:
   A. Reading books
   B. Using digital tools effectively
   C. Writing letters
   D. Drawing
2. Collaboration means:
   A. Working alone
   B. Working together
   C. Ignoring others
   D. Competing
3. Critical thinking involves:
   A. Guessing
   B. Analyzing information
   C. Copying
   D. Memorizing
4. Creativity involves:
   A. Repeating ideas
   B. Generating new ideas
   C. Ignoring tasks
   D. Sleeping
5. Communication skill is:
   A. Fighting
   B. Passing information
   C. Ignoring
   D. Playing
6. ICT skills help in:
   A. Modern jobs
   B. Farming only
   C. Sleeping
   D. None

7. Problem-solving means:
   A. Avoiding problems
   B. Finding solutions
   C. Ignoring issues
   D. Creating problems
8. Digital skills include:
   A. Coding
   B. Communication
   C. Collaboration
   D. All of the above
9. Adaptability means:
   A. Resisting change
   B. Adjusting to change
   C. Ignoring change
   D. None
10. Information literacy is:
   A. Reading only
   B. Finding and using information
   C. Writing only
   D. Typing

Data and Information

11. Data are:
   A. Processed facts
   B. Raw facts
   C. Organized facts
   D. Summary
12. Information is:
   A. Raw data
   B. Processed data
   C. Noise
   D. Input
13. Example of data:
   A. 50
   B. Report
   C. Conclusion
   D. Analysis
14. Example of information:
   A. 45, 60, 70
   B. Average score
   C. Numbers
   D. Figures
15. Processing converts:
   A. Information to data

B. Data to information
C. Data to noise
D. None

16. Data can be:
    A. Numbers
    B. Text
    C. Images
    D. All
17. Information must be:
    A. Useless
    B. Meaningful
    C. Random
    D. Wrong
18. Data without processing is:
    A. Information
    B. Knowledge
    C. Meaningless
    D. Useful
19. Which is not data?
    A. 23
    B. “Ade”
    C. Result summary
    D. 45
20. Information helps in:
    A. Decision making
    B. Sleeping
    C. Playing
    D. None

Communication System

21. Communication is:
    A. Talking only
    B. Sending and receiving messages
    C. Writing only
    D. Reading
22. Elements of communication include:
    A. Sender
    B. Receiver
    C. Message
    D. All
23. Noise is:
    A. Message
    B. Interference
    C. Sender

D. Channel

24. Medium is:
    A. Person
    B. Path of message
    C. Message
    D. Noise
25. Feedback is:
    A. Response
    B. Message
    C. Noise
    D. Channel
26. Sender is:
    A. Receiver
    B. Person sending message
    C. Medium
    D. Noise
27. Receiver is:
    A. Sender
    B. Person receiving message
    C. Channel
    D. Feedback
28. Communication can be:
    A. Verbal
    B. Non-verbal
    C. Written
    D. All
29. Face-to-face is:
    A. Digital
    B. Direct communication
    C. Broadcasting
    D. Network
30. Which is not communication?
    A. Talking
    B. Writing
    C. Sleeping
    D. Sign language

Telecommunication System

31. Telecommunication means:
    A. Manual communication
    B. Electronic communication over distance
    C. Talking
    D. Writing
32. Example of telecommunication device:

A. Phone
B. Chalk
C. Desk
D. Book

33. Internet is part of:
    A. Telecommunication
    B. Writing
    C. Drawing
    D. None
34. Mobile phones use:
    A. Telecommunication
    B. Manual system
    C. Books
    D. None
35. Satellite is used in:
    A. Farming
    B. Telecommunication
    C. Cooking
    D. Writing
36. Modem is used for:
    A. Typing
    B. Internet connection
    C. Printing
    D. Drawing
37. Fiber optic is:
    A. Wired medium
    B. Wireless
    C. Device
    D. Software
38. Wi-Fi is:
    A. Wired
    B. Wireless
    C. Manual
    D. None
39. GSM stands for:
    A. Global System for Mobile
    B. General System Machine
    C. Good System Mobile
    D. None
40. Telecommunication improves:
    A. Speed
    B. Communication
    C. Connectivity
    D. All

Broadcasting

41. Broadcasting is:
    A. One-to-one
    B. One-to-many
    C. Many-to-one
    D. None
42. Example:
    A. Radio
    B. TV
    C. Both A and B
    D. Book
43. Broadcasting reaches:
    A. One person
    B. Many people
    C. No one
    D. Few
44. TV is:
    A. Broadcasting
    B. Writing
    C. Drawing
    D. None
45. Radio signals are:
    A. Analog
    B. Digital
    C. Both
    D. None
46. Newspaper is:
    A. Broadcasting
    B. Printing
    C. Writing
    D. None
47. Live news is:
    A. Broadcasting
    B. Telecommunication
    C. Writing
    D. None
48. Audience means:
    A. Sender
    B. Receiver group
    C. Message
    D. Noise
49. Broadcasting uses:
    A. Transmitters
    B. Receivers
    C. Both

D. None

50. Example of mass media:
    A. TV
    B. Radio
    C. Internet
    D. All

Types of Data Network

51. LAN means:
    A. Local Area Network
    B. Large Area Network
    C. Long Area Network
    D. None
52. WAN means:
    A. Wide Area Network
    B. Wire Area Network
    C. Web Area Network
    D. None
53. MAN means:
    A. Metropolitan Area Network
    B. Main Area Network
    C. Medium Area Network
    D. None
54. PAN means:
    A. Personal Area Network
    B. Private Area Network
    C. Public Area Network
    D. None
55. LAN covers:
    A. Small area
    B. City
    C. Country
    D. World
56. WAN covers:
    A. Building
    B. City
    C. Country
    D. Global
57. Example of WAN:
    A. Internet
    B. LAN
    C. PAN
    D. None
58. PAN example:

A. Bluetooth
B. Internet
C. TV
D. Radio

59. MAN covers:
    A. Building
    B. City
    C. Country
    D. World
60. Networks allow:
    A. Sharing
    B. Communication
    C. Resource use
    D. All

Network Topology

61. Topology is:
    A. Speed
    B. Layout
    C. Size
    D. Cost
62. Star topology uses:
    A. Hub
    B. Cable
    C. Server
    D. None
63. Bus topology uses:
    A. Single cable
    B. Hub
    C. Switch
    D. None
64. Ring topology forms:
    A. Circle
    B. Line
    C. Star
    D. Mesh
65. Mesh topology is:
    A. Fully connected
    B. Partly
    C. Linear
    D. None
66. Star topology advantage:
    A. Easy to manage
    B. Difficult

C. Slow
D. None

67. Bus topology disadvantage:
    A. Cable failure affects all
    B. Fast
    C. Reliable
    D. None
68. Ring topology uses:
    A. Token
    B. Hub
    C. Server
    D. None
69. Mesh topology is:
    A. Expensive
    B. Cheap
    C. Slow
    D. None
70. Topology affects:
    A. Performance
    B. Cost
    C. Reliability
    D. All

Application Areas of ICT

71. ICT in education:
    A. E-learning
    B. Teaching
    C. Research
    D. All
72. ICT in banking:
    A. ATM
    B. Online banking
    C. Transfers
    D. All
73. ICT in health:
    A. Telemedicine
    B. Records
    C. Diagnosis
    D. All
74. ICT in agriculture:
    A. Weather info
    B. Market prices
    C. Both
    D. None

75. ICT in transport:
    A. GPS
    B. Ticketing
    C. Tracking
    D. All
76. ICT improves:
    A. Efficiency
    B. Productivity
    C. Speed
    D. All
77. E-commerce is:
    A. Online buying
    B. Offline buying
    C. Selling only
    D. None
78. ATM stands for:
    A. Automated Teller Machine
    B. Automatic Transfer Machine
    C. Auto Teller Machine
    D. None
79. Online classes use:
    A. ICT
    B. Chalk
    C. Paper
    D. None
80. ICT helps communication by:
    A. Speed
    B. Distance
    C. Cost reduction
    D. All

General Revision

81. Internet is:
    A. WAN
    B. LAN
    C. MAN
    D. PAN
82. Bluetooth is:
    A. PAN
    B. WAN
    C. LAN
    D. None
83. Router connects:
    A. Networks

B. People
C. Books
D. None

84. Switch connects:
    A. Devices
    B. Books
    C. People
    D. None
85. Server provides:
    A. Services
    B. Books
    C. Food
    D. None
86. Client is:
    A. User computer
    B. Server
    C. Network
    D. None
87. Network cable is:
    A. Wired medium
    B. Wireless
    C. Device
    D. None
88. Satellite is:
    A. Wireless medium
    B. Wired
    C. Device
    D. None
89. ICT means:
    A. Info & Comm Tech
    B. Internet Computer Tech
    C. Internal Comm Tool
    D. None
90. Email is:
    A. Communication tool
    B. Device
    C. Network
    D. None
91. SMS is:
    A. Text message
    B. Voice
    C. Video
    D. None
92. WhatsApp is:
    A. Communication app
    B. Hardware

C. Network
D. None

93. Network security protects:
A. Data
B. Devices
C. Systems
D. All

94. Password protects:
A. Account
B. Food
C. Books
D. None

95. Virus is:
A. Malware
B. Hardware
C. Software
D. None

96. Antivirus is:
A. Protection
B. Virus
C. Network
D. None

97. ICT supports:
A. Learning
B. Business
C. Communication
D. All

98. Digital world means:
A. Technology use
B. Farming
C. Sleeping
D. None

99. Technology improves:
A. Life
B. Work
C. Communication
D. All

100. ICT future depends on:
A. Innovation
B. Skills
C. Technology
D. All

SECTION B: THEORY (10 QUESTIONS –

ANSWER all)

1. Define data and information with examples.
2. Explain five 21st-century digital skills.
3. Describe the communication process with a diagram.
4. Explain telecommunication system and list its components.
5. Differentiate between telecommunication and broadcasting.
6. Explain four types of data networks.
7. Describe four network topologies with diagrams.
8. Explain five application areas of ICT.
9. State advantages and disadvantages of ICT.
10. Explain the importance of digital skills in modern society.
11. explain robotics, ai and machine learning

SECTION C: PRACTICAL / APPLIED (ANSWER ALL – 7 QUESTIONS)

1. Draw and label:
   a. Star topology
   b. Bus topology
2. Draw and explain ring topology.
3. A school wants to connect computers in one building:
   a. Name the network type
   b. Give two reasons
4. Explain how ICT is used in education.
5. Explain how ICT is used in banking.
6. Differentiate between data and information with three examples.
7. List three communication devices and explain their uses.
